Novelty (N)	Claims	1 - 10	YES

2. Citations and explanations (Rule 70.7)

The following documents are referred to in this report:

D1: CN 1113913 A (27 Dec. 1995)

D2: CN 1110970 A (01 Nov. 1995)

D3: US 6388091 B1 (14 May 2002)

1. Novelty and Inventive Step

Claims 1-10 of the present invention relate to a process for preparing a compound of formula 1 (1,2,3,9 -tetrahydro -9- methyl -3 [(2-methyl -1H -imidazole-1-yl) methyl]-4H-carbazol-4-one, i.e. ondansetron), which comprises reacting a compound of formula 2 with a compound of formula 3 and a compound of formula 4 by one step in the presence of an acid, an alkylsilylhalide compound or an acylhalide compound in a solvent.

D1 discloses that 2-methyl imidazole salt, N-methyl tetrahydrocarbazolone, and polyformaldehyde are reacted to synthesize ondansetron by one step.

D2 discloses a process for preparing ondansetron by reacting a compound of formula(II), aldehyde, and 2-methyl imidazole.

D3 discloses a process for preparing ondansetron by reacting a compound of formula(II) and a compound of formula (III) in the presence of a halosilane compound.

As mentioned before, D1-D3 disclose a process for preparing ondansetron, but none of D1-D3 discloses a process using the reactant compound of formula 2 in the present invention. Thus, claims 1-10 of the present invention can be considered to be novel over D1-D3 [Article 33(2) PCT].

Since there is no suggestion or implication in D1-D3 to lead those who skilled in the art to expect that the said three reactants(formula 2, 3, 4) in the present invention can be reacted to prepare ondansetron by one step, the inventive step of claims 1-10 in the present invention can be acknowledged over D1-D3 [Article 33(3) PCT].

2. Industrial Applicability

The subject-matter of claims 1-10 appears to be industrially applicable [Article 33(4) PCT].
